COMPLEO

The power to move

Compleo is a provider of high-quality charging technology for electromobility - developed and manufactured to the highest quality standards.

Compleo charging stations and wall boxes are easy to use, efficient to install and operate, and offer maximum compatibility. As part of the global KOSTAL Group, Compleo combines innovation with tradition.

DUO ims

Max. 2x 22 kW, 2 AC charging points

The DUO ims was specially designed for direct connection to the public distribution grid. The DUO ims meets all the requirements of the calibration law and the technical requirements of VDE-AR 4100. The optional integrated payment terminal of the DUO ims is ready for activation via charging cards or direct payment via smartphone, credit and debit card, including PIN pad.

- ✓ Complies with German Technical Connection Requirements (TAB) and VDE-AR 4100
- ✓ Bright 4.3‘‘ display (incl. QR code for secure direct payment)
- ✓ All protective components integrated
- ✓ Integrated load management
- ✓ SMC base (light and stackable) with filling granulate
- ✓ Ducto: tool for easy configuration of charging stations

DUO & DUO fleet

Max. 2x 22 kW, 2 AC charging points[1]

Your favorite for parking facilities: The DUO is calibration lawcompliant and saves you time and money when installing and operating your charging stations. The DUO fleet with Power Rail technology is recommended for projects with three or more stations. The busbar cabling system offers 30% and more savings on installation. All DUOs are equipped with the automatically resettable Service RCD – which reduces servicing effort.

DUO line

- ✓ Safety technology: Overvoltage protection type 1-2-3 and Service RCD (with remote test function)
- ✓ Bright 4.3'' display (incl. QR code for secure direct payment)
- ✓ Integrated load management
- ✓ SMC base (light and stackable) with filling granulate

DUO fleet

- ✓ With Power Rail technology and Ethernet switch (4 free connections)
- ✓ Optional 2x type 2 spiral cable (6.5 m/11 kW) or 2x type 2 socket

[1] Standard variant with 2x Type 2 socket

DUO wm & DUO fleet wm

Max. 2x 22 kW, 2 AC charging points[1]

The DUO wm is a dual wallbox that offers barrier-free charging – at any desired height. All components are already integrated into the wall-mounted (wm) charging station, making it ideal for use at publicly accessible charging points as well as for networked operation in apartment buildings and businesses. Model variants are available for cost-effective daisy-chain cabling (Power-Rail) as well as with attached charging cables. All DUO wm models feature Compleo's Service RCD.

DUO wm general

- ✓ Accessibility: wall-mounted for two parking spaces
- ✓ Safety technology: Type 1-2-3 surge protection and Service RCD (remote test function)
- ✓ High-brightness 4.3-inch display (including QR code for secure direct payment)
- ✓ Integrated load management
- ✓ Stackable SMC base with filling granules

DUO fleet wm

- ✓ With Power-Rail technology and Ethernet switch (4 free ports)
- ✓ Optional: 2x Type 2 coiled cables (6.5 m/11 kW) or 2x Type 2 sockets

[1] Standard version with 2x Type 2 sockets
